

BRAVIA EZ20L Series

Professional display rated for 16/7 operation with essential professional functions;
available in a full range of screen sizes

Overview

Business-friendly with easy content sharing, control and customisation

Ideal for digital signage and corporate applications, slim, easy-to-use BRAVIA EZ20L Series professional displays add impact to all your visual communications. Very high 4K picture quality is complemented by simple setup, content sharing and networked control in today's connected AV environments.

Features

Advanced picture technologies for brilliant 4K image quality

Available in screen sizes from 43"-85", BRAVIA EZ20L Series features advanced Sony picture processing technologies ensure your content looks its best with fine detail, brilliant colours and smooth movement. The panel offers 350 nit brightness* for high visibility in indoor environments, with a wide viewing angle to ensure everyone in the room enjoys crisp, clear images wherever they're positioned.

*except 50"/85" (50"/85" are VA panel)

Vivid, natural colour

Live Color technology brings images alive with a brilliant

palette of vibrant, natural colours.

Enjoy finer detail

4K X-Reality PRO upscales pictures closer to true 4K quality. Images are sharpened and refined in real time, revealing extra detail from lower-resolution content.

Smooth on-screen movement

Motionflow XR ensures smoother, more natural reproduction of rapidly-moving on-screen images.

Great pictures deserve brilliant sound

The slim design of BRAVIA EZ20L incorporates an X-Balanced Speaker™, offering clear voice quality to enhance video conferences and digital signage.

Installation flexibility to suit every environment

The slim styling of BRAVIA EZ20L Series brings a more professional touch to today's corporate and retail spaces. The display's elegant lines are further enhanced by practical features for seamless integration in any environment.

Portrait or landscape installation

Install BRAVIA in portrait or landscape orientation to suit any corporate space. The display can also be tilted at an angle for even greater flexibility.

NB: FW-85EZ20L installation position cannot be tilted

Easy access side-mounted connections

Signal connections, networking and other interfaces are conveniently side mounted for easy installation and access when the display's in portrait position.

Quick, easy setup

Simple Pro Settings allows customisation of BRAVIA to suit the demands of any business or retail environment.

Schedule power on/off times, select input source on switch on, wake up the display when an input signal's detected – and more.

Networked control

Remotely control and monitor BRAVIA display functions – like power on/off, input source and volume – over IP networks or using familiar RS-232C protocols.

Signage made simple

Built-in support for HTML5 makes it easy to display interactive signage content on BRAVIA without the need for a dedicated set-top box, media player or PC. The on-board BRAVIA Signage Free (BSF) 2.0 app automatically plays out HTML content including videos and photos from the display's internal 16GB storage, or when a USB stick memory is slipped into BRAVIA.

Wireless screen mirroring

Easily mirror content wirelessly from handheld device onto BRAVIA with in-built support for Apple AirPlay and Google Chromecast.

Sustainability in every scene

With growing demand for ever larger display screens, there is also the risk of greater resource and energy use. However, Sony's sustainability commitments are realizing efficiency gains from product development right through to customers viewing screens.

Specifications

General Features

Screen Size	option 1: 85" (US Only)
