All-in-One

Smart Signage with Ultra-Thin Bezels

BenQ Smart Signage Series

4K ULTRA HD · Orientation · USB Plug & Play · X-Sign Embedded · DMS Tools · 400nits

Because it matters

All-in-one smart signage with ultra-thin bezels

The ST02S upgrades enterprise, corporate and organisational conference capabilities while maintaining superb return on investment. Visuals are delivered in 4K ultra HD with vivid colours and sharp contrast on thin-bezel screens, putting an end to vague, blurry image quality that detracts from the impact and productivity of teleconferencing.

Made for Effective Meetings and Presentations

Successful Meetings with Optimal Clarity

4K ultra-high definition resolution (3840 x 2160) offers the most exquisite image detail for captivating meeting experiences.

True 4K UHD Detail

The ST02S is engineered to give users a more expansive canvas to showcase presentation, designs, ideas, and plans.

Easy-to-go Stand

Enables smart signage solutions with versatility on a whole new level. With removable wheels, the easy-to-go stands let you quickly move signage from one meeting room to another to maximise usability, reduce complexity, and save on unnecessary costs.

Work, Done More Effective

Hassle-free Video Conferencing

Start video meetings with a simple click on the ST02S. The OPS slot-in PC is fully compatible with top video conferencing solutions such as Zoom Rooms, Microsoft Teams, Google Meet, and Cisco Webex. TeamViewer Meeting is also pre-installed on all ST series displays.

Ready for "Bring Your Own Device" with InstaShare

Two-way mirroring and two-way touch control, plus up to 4 split screens supported - InstaShare has got you covered on your favorite personal devices, so go ahead and BYOD.

Built-In Android OS

Saves users the need for an external device as a source for an operating system, and means more gets done directly on the display for increased efficacy and user convenience.

Plug and Play

Lets you access and play multimedia files directly from a USB flash drive without requiring a PC connection or complicated setup.

Match your corporate image

The ST02S has a friendly interface, allowing you to switch and customise the default wallpaper to show your corporate image.

Management simplified

Free yourself from fuss. We've streamlined device and user management for you so you can focus on things that matter more.

Display Management System (DMS)

Centralised display management and the ability to keep display firmware and apps up to date via LAN or Internet.

- Device Info and Management
- Apps Management
- OTA (Over-the-Air) Update
- Dashboard

X-Sign CMS and Broadcasting Software

Edit, manage, and customise content in depth through the intuitive X-Sign Content Management Software (CMS), on-board the ST02S. Additionally, X-Sign Broadcast keeps teams in the know with a smart broadcasting system that offers instant delivery and easy management of push alerts, messages, and announcements.

- Scheduled Broadcasting
- Live Streaming
- Group Message Broadcasting
- YouTube Videos

McAfee™ Together is power.

Data and device protection

Protect your displays against malware while securing corporate data. BenQ offers data security and device protection through McAfee Mobile Security.
