Screwdriver required

# Ora 10

High capacity

Extended performance and versatility to a new class of ultrawide curved monitors.

For monitors to 10kg.

MONITORS TO  
**49"**

## INSTALLER OPTIMISED

Ora 10 design incorporates five elements that speed installation & setup, especially beneficial when deploying at scale. A professional installer was clocked at 1-minute install.

## CONFIDENT PERFORMANCE

Extensively tested across hundreds of units & millions of cycles, Atdec confidently offers a 10 year warranty to reinforce our proven record of quality and performance.

## SUSTAINABLE

Ora 10 is sustainable from manufacture to disposal. Following a long service life with monitor upgrades, Ora 10 breaks down to recyclable components to minimise environmental impact.

# Installer optimised

Fast desk connect with single point  
thumb knob & slotted F-connection

One-point dynamic  
arm assembly

Tension balance may  
be adjusted without  
removing screens

Contemporary minimal  
aesthetic suitable for all  
office styles

Visual tension indicator for multiple setups & projects

Drop-on quick connect VESA head & hands-free click-release lock

Easy access & generous cable management

360° or 180° rotation limiter switch

Complete in one box for fast access & reduced wastage

## Limiter switch

One-flip 360° or 180° lock

Activate the Ora 10 rotation limiter with this always-accessible switch. No disassembly or reconfiguration, no time wasted.

# Furniture & IT install friendly

HIGH CAPACITY UNIVERSAL MONITOR ARM

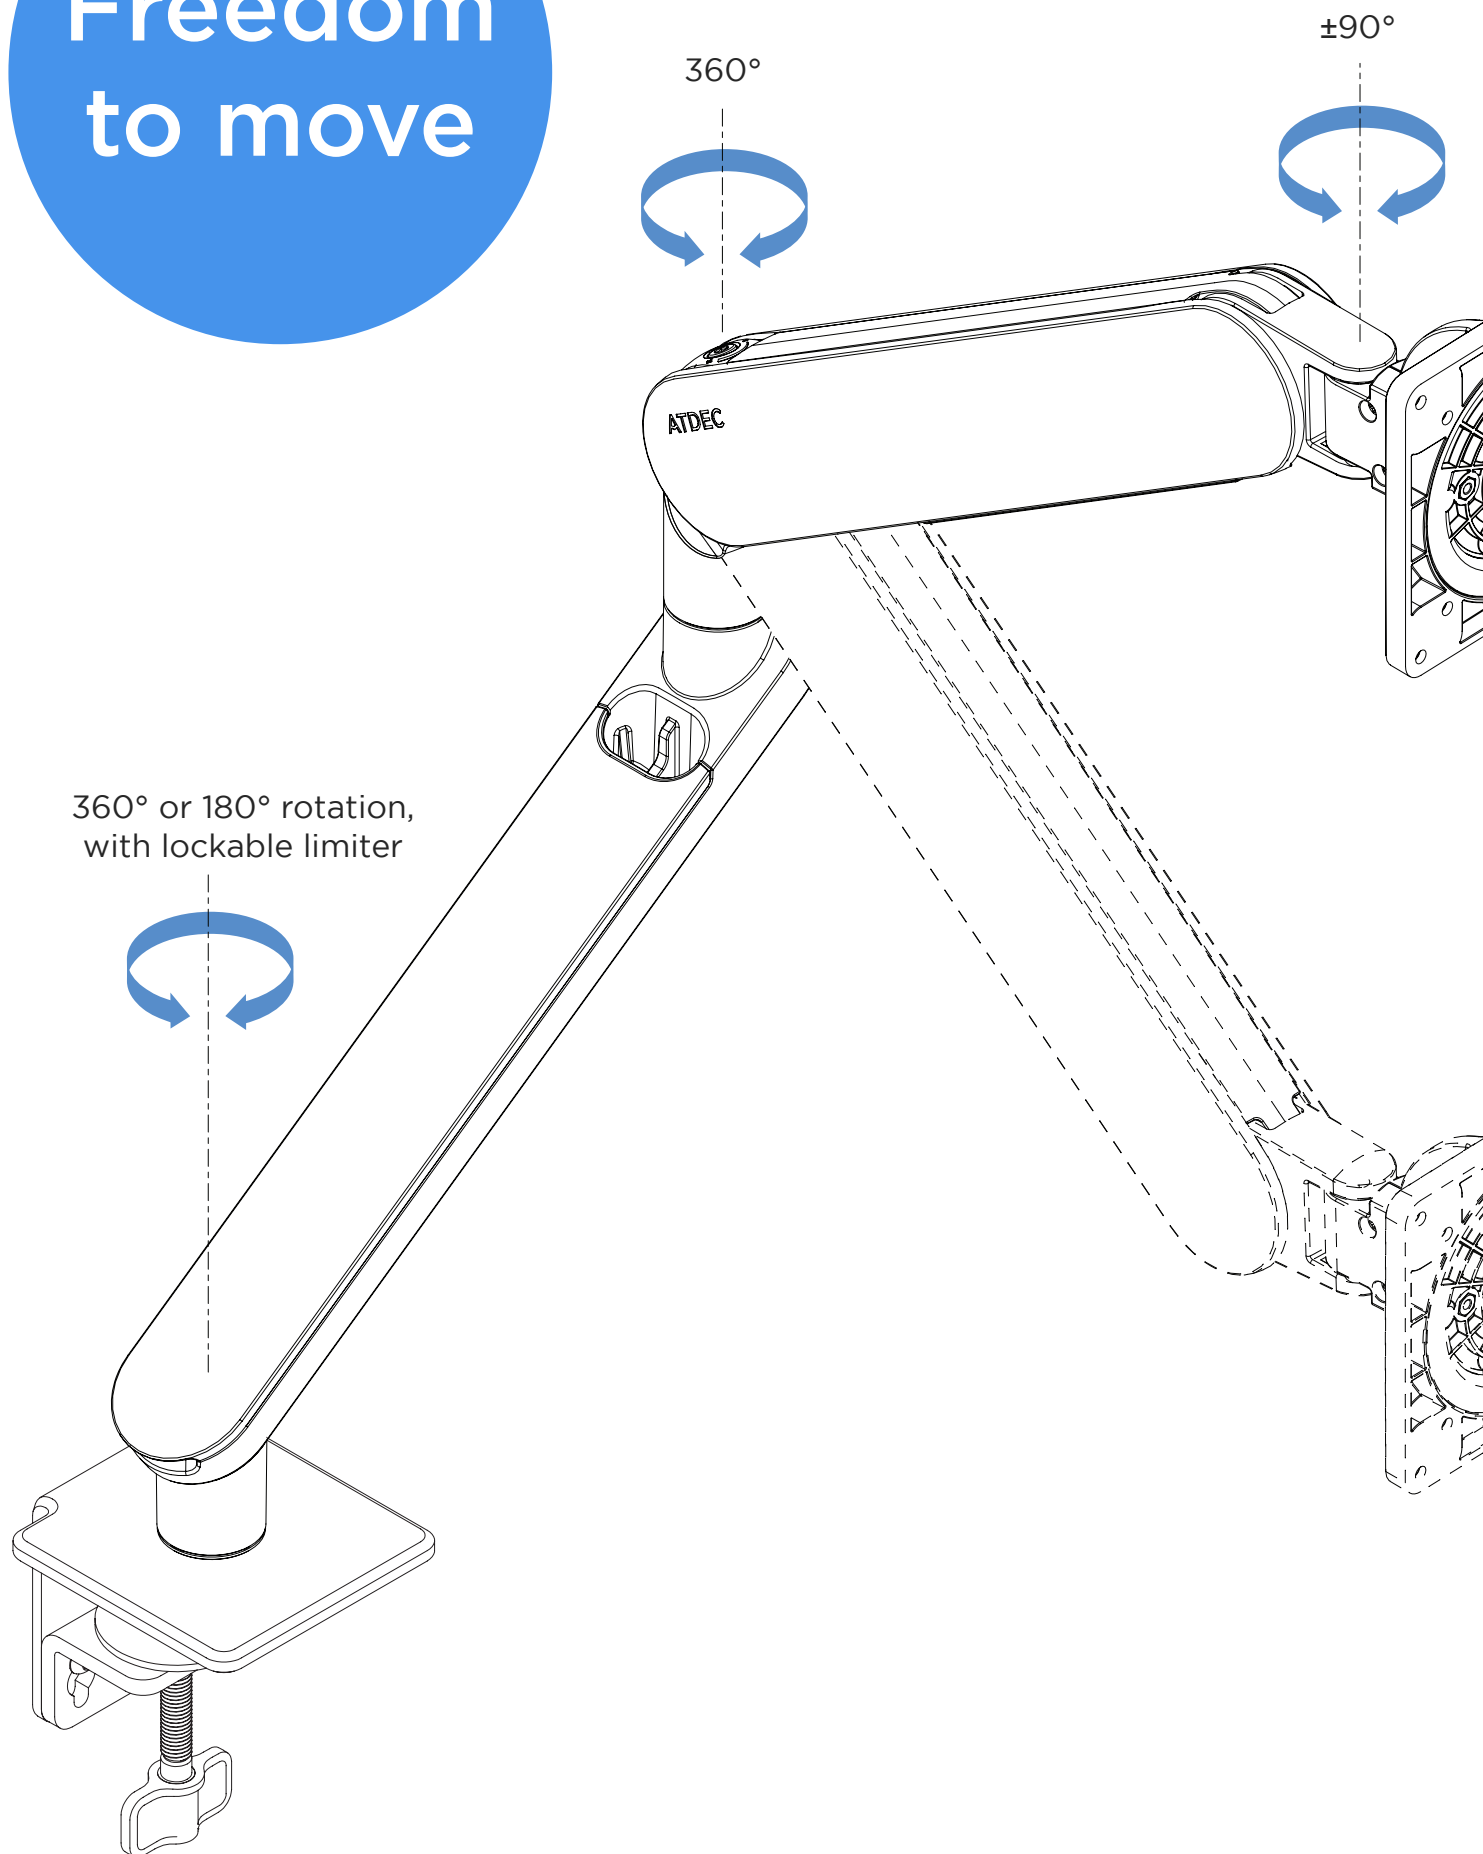

## Slotted connection

Save time under the desk

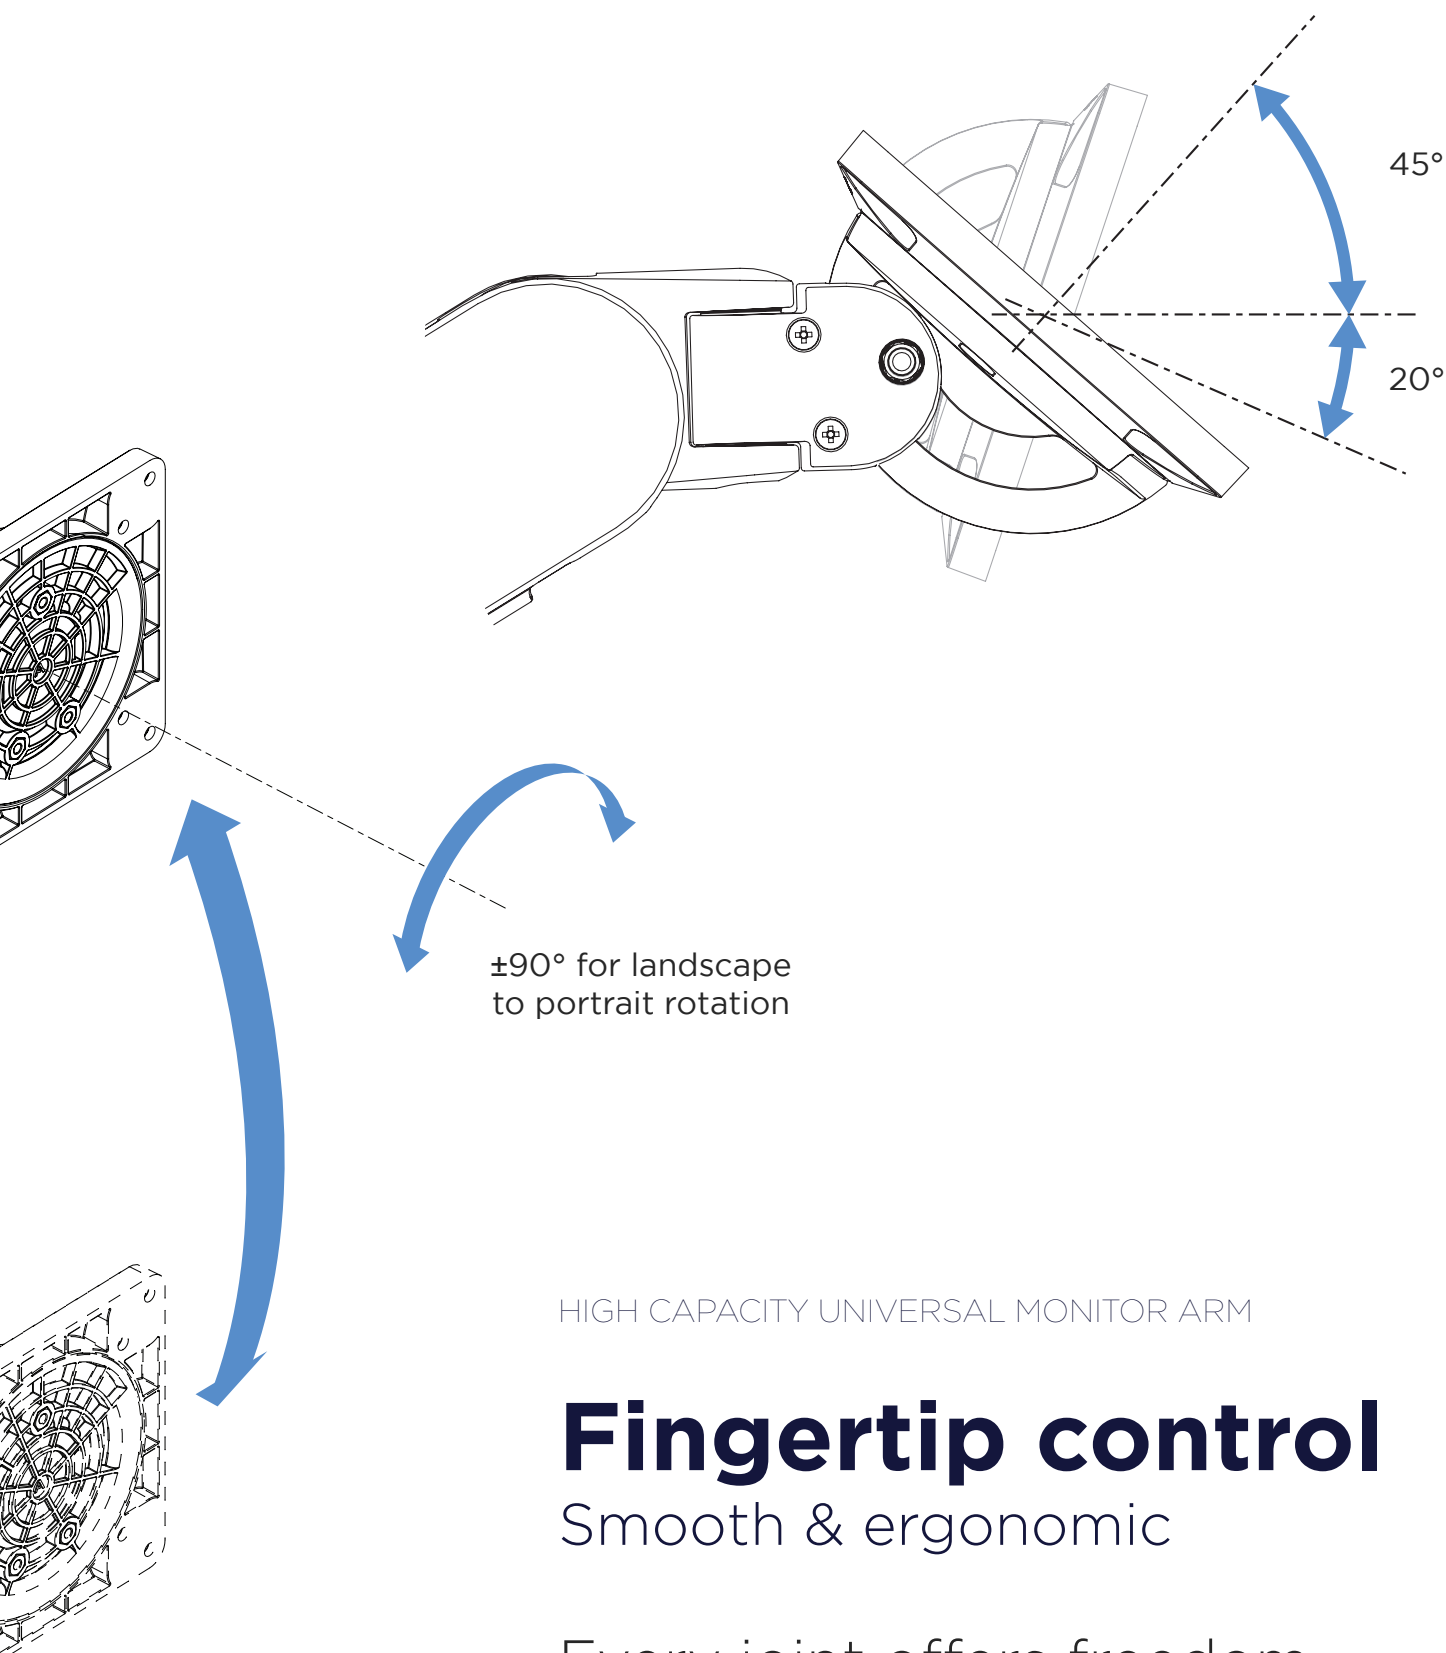

Pre-assemble the most time consuming part of clamp installation to save time & hassle. Particularly beneficial for tight desk setups.

# Freedom to move

HIGH CAPACITY UNIVERSAL MONITOR ARM

## Fingertip control

Smooth & ergonomic

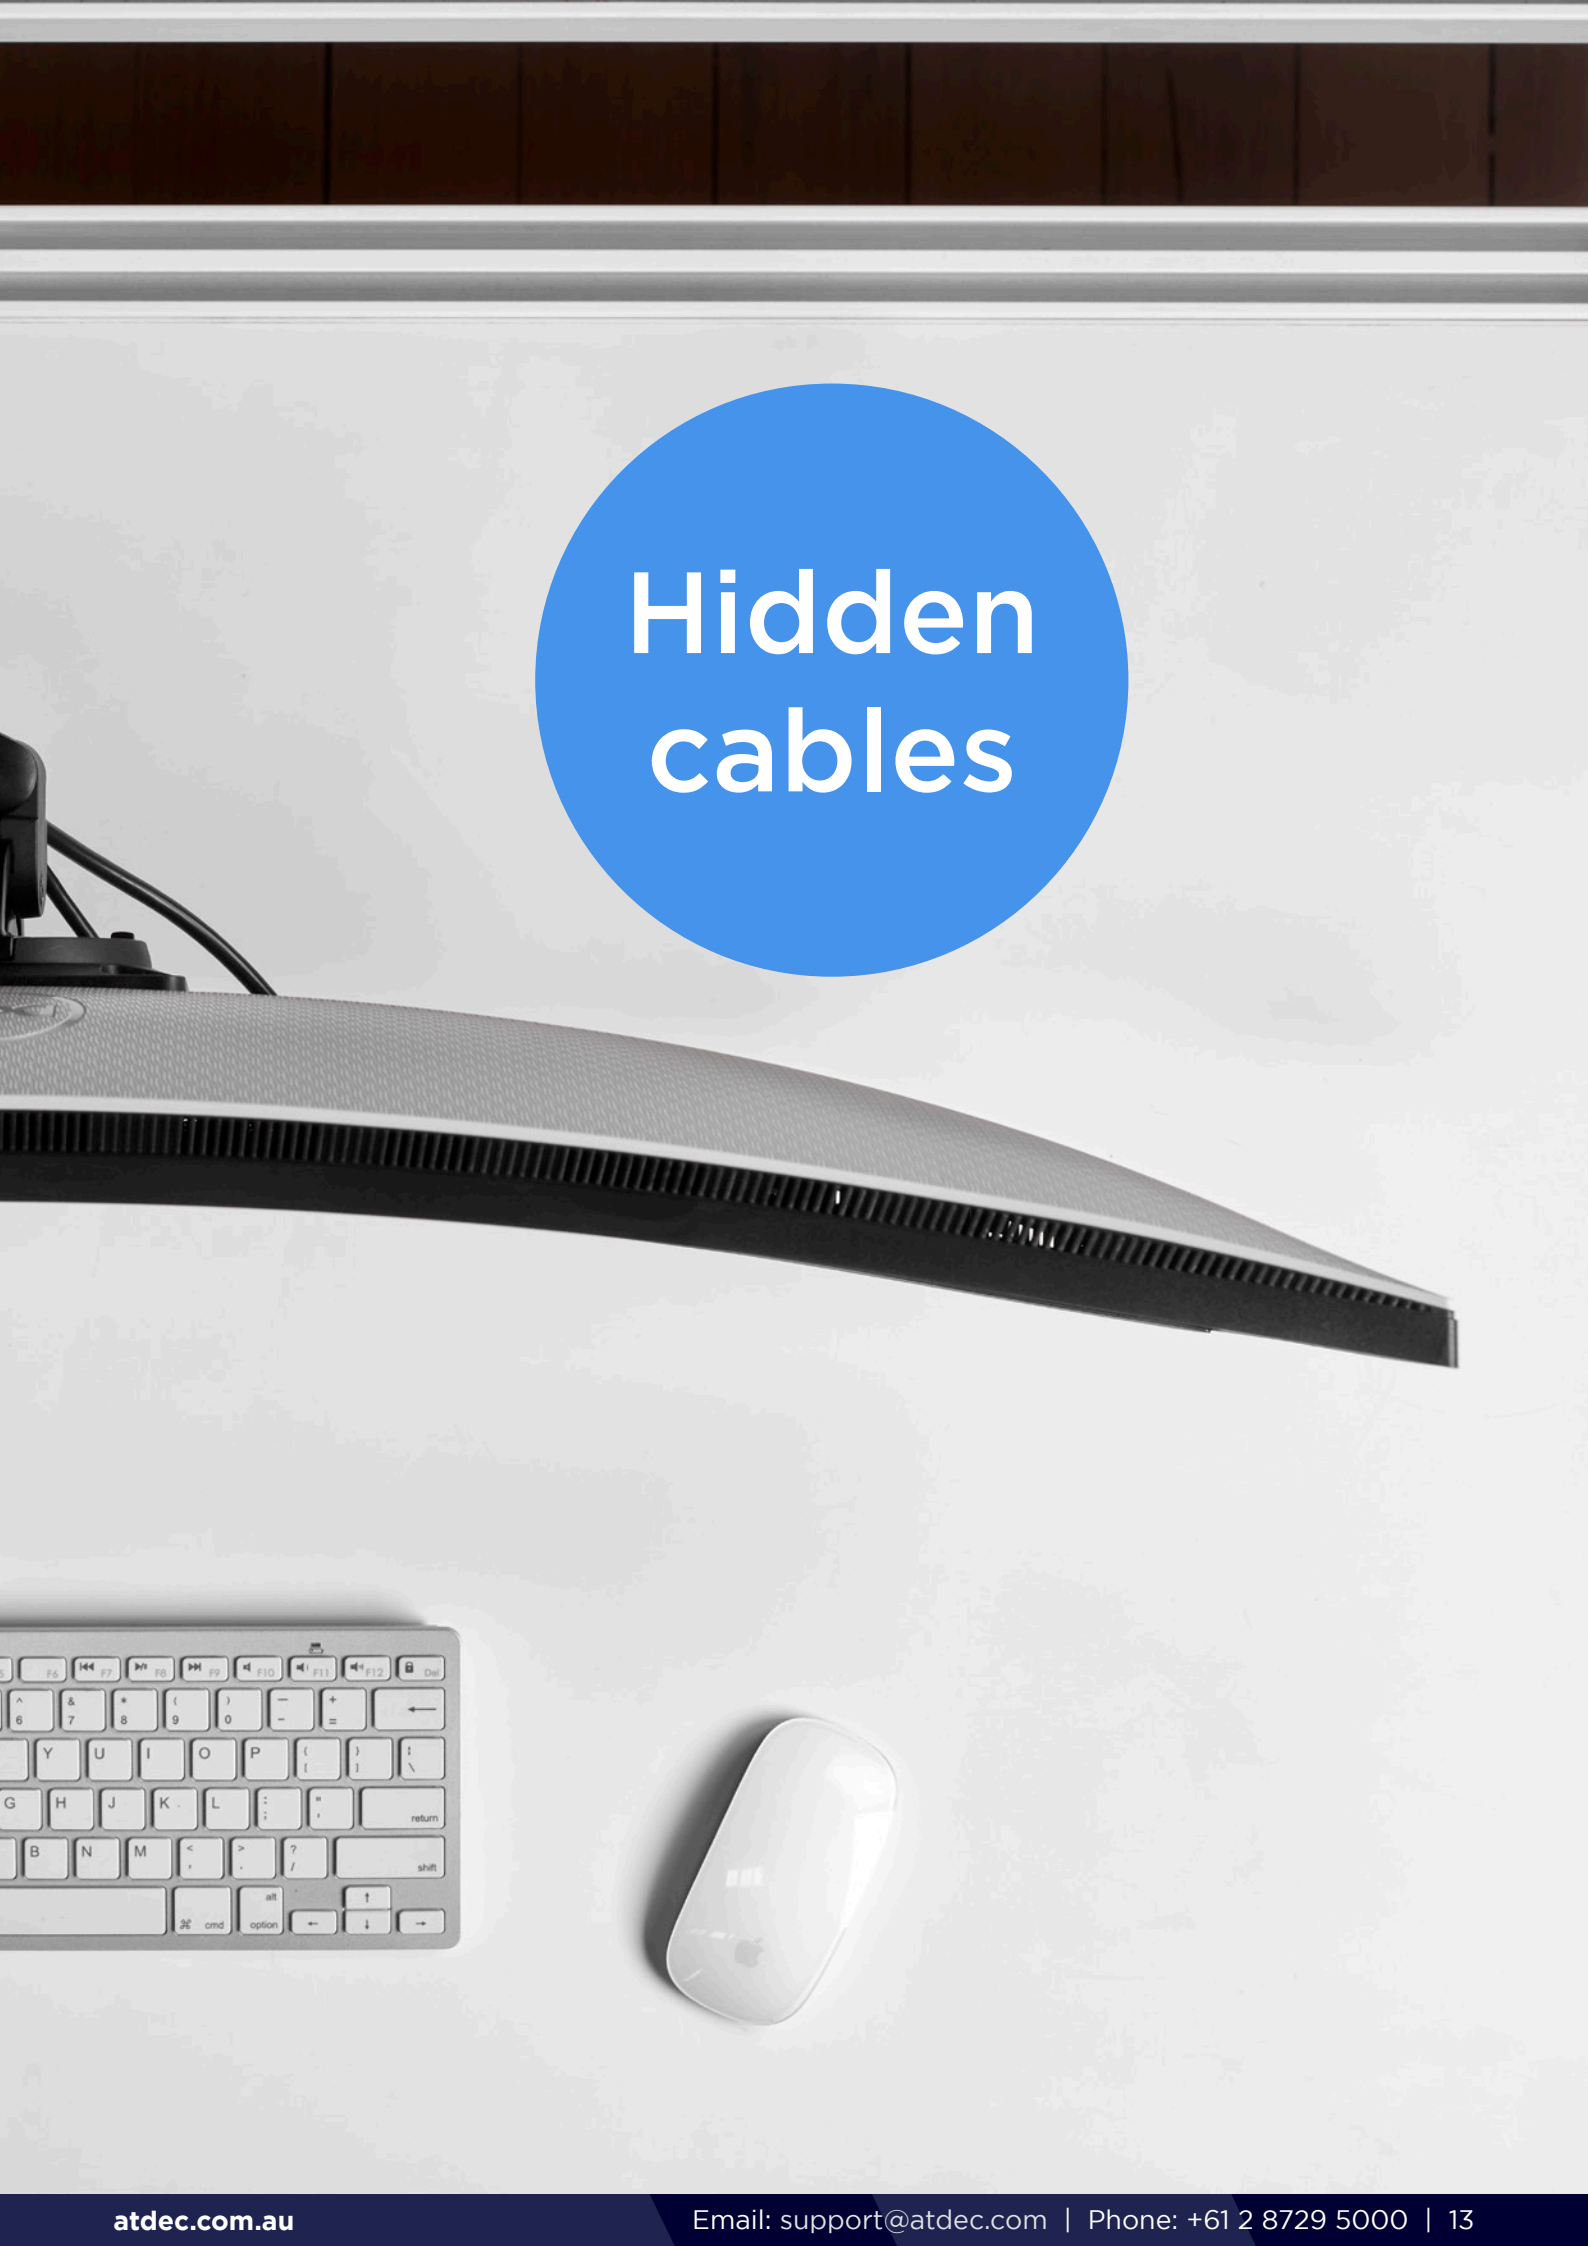

Every joint offers freedom to move, activated with the touch of a finger. Ora 10 comes standard with a rotation limiter and lock.

Ora 10 offers even greater cable management space, ensuring cables are almost entirely concealed. The upper link features a spacious internal cable bay, while the lower link includes a larger, easily accessible cable berth, which also stores the provided hex key.

A curved computer monitor is shown from a low angle, with its top edge visible. A blue circle is overlaid on the monitor's screen area, containing the text "Hidden cables" in white. The background is a light, textured surface.

# Hidden cables

A large, black, rectangular monitor is the central focus, positioned on a light-colored wooden desk. Above the monitor, a modern, circular, black lamp with a white interior is suspended. The background is slightly blurred, showing a white wall and some office furniture. In the foreground, a grey keyboard and a blue folder are partially visible on the desk.

Ora 10 monitor arm is perfect for single or dual-monitor desks, supporting larger productivity displays. Its robust build and flexibility enhance workspace ergonomics, making it ideal for current setups or futureproofing for upgrades.
