innovatecharger App

Smart Power Management made Simple

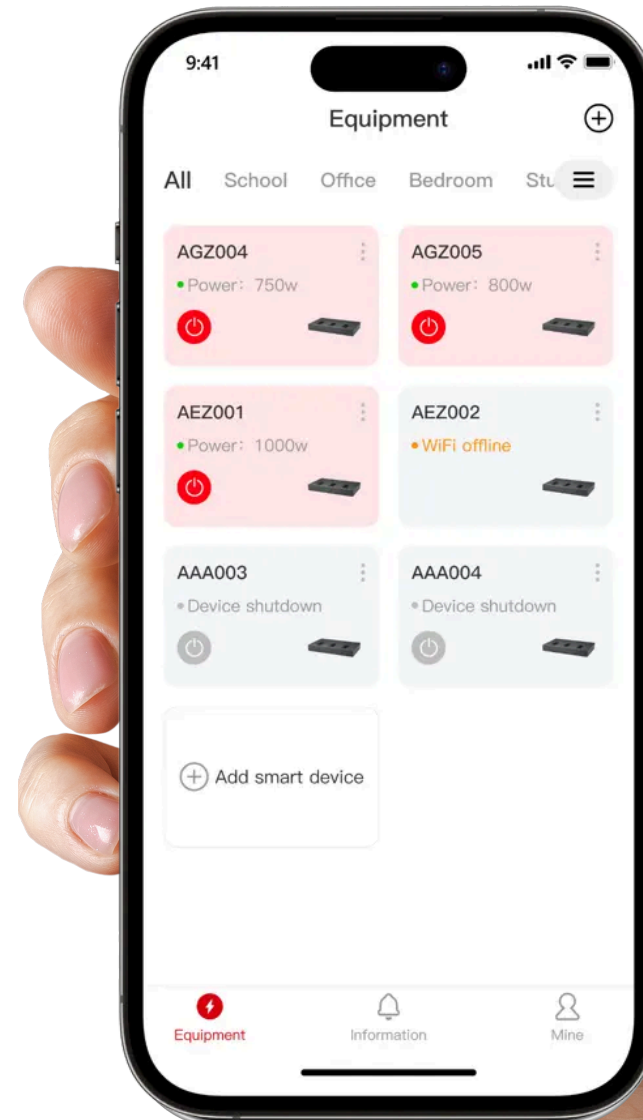

- ✓ Control multiple charging stations from one app
- ✓ View real-time charging status — charging or fully charged
- ✓ Share secure access with up to 10 users
- ✓ Monitor device temperature
- ✓ Track daily/cumulative power usage
- ✓ Remotely power devices on/off and set scheduled timers
- ✓ Group charging stations for simplified management
- ✓ Receive instant alerts for alarms and shutdown events
- ✓ Quickly register charging stations via QR code scanning

App Set Up

1. Download the innovatecharger app from the App Store or Google Play onto your smart device and create an account.
2. Open the app, log in, and tap Add Device. Scan the QR code located on the front of the trolley or on the charging unit inside the cabinet.
3. Ensure the charging cabinet is plugged in and powered on.
4. Using a pin, press and hold the reset button on the cabinet for 5 seconds to activate pairing mode (refer to unit diagram for button location).
5. On your smart device, go to Wi-Fi settings and connect to the network named LVS00001.
6. Once connected, return to the app and enter the name (SSID) and password of your home or office Wi-Fi network to complete the setup.

NOTE - Wi-Fi Connection must be on 2.4Ghz (not 5GHz)
