

How schools protect their Microsoft 365 and Google Workspace data using Synology

Backup not only ensures that an educational organisation meets industry standards and regulations but also serves as a simple insurance policy to alleviate your disaster recovery headaches. In the event that your school experiences service downtime or accidental/malicious deletions, you can ensure that students and staff have continuous access to their data in their classrooms. With Synology's comprehensive SaaS backup solution, you can protect school's precious data without having to pay expensive recurring subscription fees.

Comprehensive protection for your SaaS data

Active Backup for Microsoft365

Protect all your critical data on OneDrive for Business, SharePoint Online, Exchange Online, and Teams, no matter whether you have the Business, Enterprise, or Education plan.

Active Backup for Google Workspace

Back up your Google Workspace My Drive and shared drives, mail, contacts, and calendar, with this on-premises solution.

Accessible features to help you manage backup tasks requiring no extra licensing

Minimise the risk of data loss with flexible features that not only protect your data but also allow you to manage it, all without incurring fees.

Scheduled backups

Perform backups when convenient, ensuring data protection without disrupting business operations.

Flexible versioning

Keep as many file versions as required and restore them when needed.

Efficient storage

Save space and bandwidth with single instancing and block-level deduplication.

Advanced recovery

Granular recovery, search and preview, item exporting, and self-service recovery portal.

See what these schools are saying about Synology's SaaS backup solutions.

Methodist Ladies' College

"The Synology solution is ultimately far more cost-effective with its license-free model, especially when looking at the total cost of ownership over an extended period of time."

- Cameron Munro, IT Manager, Methodist Ladies' College

King's Baptist Grammar School

"Having over 1000+ users using the cloud, Synology NAS and Active Backup for Microsoft 365 make sense for King's Baptist Grammar School because of its subscription-free model."

- Brendan Haywood, Network Support, King's Baptist Grammar School

St. Paul's School

"Synology's Active Backup for Microsoft 365 provides a flexible, robust solution to facilitate its above compliance requirements, and the ability for St. Paul's School to restore with single-click items into users"

- Justin McGee, IT Manager, St. Paul's School
